

# iglide Application Guide

## iglide® M250

Thick and Robust

- Excellent vibration dampening
- Resistant to edge loading
- High impact resistance

## iglide® R

Low Friction, Low Cost

► Section 3

- Low friction value
- Very low cost

## iglide® J

The Fast and Slow Motion Specialist

- Low wear against different shaft materials
- Low coefficients of friction in dry run
- Best performance with soft shaft materials

## iglide® L280

The Marathon Runner

► Section 5

- For especially long service life
- Low coefficient of friction
- Also suitable for soft shafts

## iglide® G300

The All-Round Performer

- For above average loads
- Dirt and dust resistant
- More than 900 sizes available from stock

## iglide® Q

Fit for High Loads

► Section 7

- Excellent wear resistance at high loads
- Recommended for extreme p x v values
- Maintenance-free dry running

## iglide® P

Cost-Effective and Maintenance-Free

- Low moisture absorption
- Low wear rates
- Cost-effective

## iglide® Q2

Special Applications

► Section 9

- Cost-effective
- For use in wet environments
- Good wear resistance at medium loads

## iglide® H370

The Underwater Specialist

- Excellent for underwater applications
- Wear-resistant
- Good chemical resistance

## iglide® A180

Food Applications

► Section 11

- Complies with the regulations of the FOOD AND DRUG ADMINISTRATION
- For wet environments

## iglide® A200

Food Applications

- Complies with the regulations of the FOOD AND DRUG ADMINISTRATION
- For low speeds
